

Thinking about CBE?

Join a network that supports schools and districts moving towards **COMPETENCY-BASED EDUCATION**

Competency-based education (CBE) prepares students for success in the world we live in today by:

- **personalizing** the experience of all students;
- **nurturing** student agency and ownership of their journey through school; and
- **supporting** anytime, anywhere learning.

Building 21's Affiliate Network supports schools, networks, and districts by offering a competency-based learning model and learning management system with data analytics, teacher professional development, and leadership coaching.

The four pillars that support our network:

Graduation Requirements:

A common definition of success inspired by NGLC's MyWays™

Competency-based Learning Model:

Design, assessment, feedback, progress and growth are all facilitated through performance-based assessments aligned to our competencies and continua.

Studio Model:

Problem-based/project-based instruction culminating in the authentic application of learning

Tools & Systems:

A common set of tools and systems to manage teaching and learning including a complete competency-based learning management system, data analytics engine, and personalized learning plan

building21 AFFILIATE PROGRAM overview

Building 21 offers a fully-integrated suite of products and services that enables schools, districts, and networks to make the transformation to competency-based education (CBE) in which students progress towards graduation based on mastery.

Grad Reqs inspired by NGLC's *MyWays*™

Next-generation graduation requirements that: measure and credit a broader and deeper array of habits, mindsets, skills, and experiences; redefine readiness for students; and prepare them for their journey through the post-high school wayfinding decade of learning and working.

Competency Framework: *Learning What Matters*

A complete set of competencies and detailed learning progressions for all credit requirements aligned to relevant standards (Common Core, etc.), and a policy guide for promotion and graduation.

Learning Management System: *Slate*

Competency-based learning management system that allows students and teachers to track mastery of competencies as well as work habits within learning experiences.

Student Analytics Engine: *PLP*

The student's compass—a personalized learning pathway or *PLP*—to help them navigate their progress, set and monitor goals, and log reflections about their experience.

School Analytics Engine: *School Compass*

Integrated data analytics engine that transforms data into actionable intelligence. Customized by user—*students, families, teachers, counselors and administrators*—and providing real-time information on student wellbeing, academic performance, and growth.

Systems Configuration and Integration

Configuration of *Slate* and *School Compass* to meet particular needs of local context and support for critical product integration with external systems.

Teacher Training

Introduction and training on competency-based learning system including crediting and progression, evidence requirements, working with continua and competencies, norming student work, and *Slate*.

Leadership Training and Coaching

Building capacity of school administrators and district staff to transition effectively to a competency-based system including all the teacher training topics as well as professional development planning.

Our network can help you plan and launch a new school or transform an existing school. We can also assist as you test the waters with just one grade, subject, or class.

Our expanding network currently serves 3,000 students in eight schools across five states.
